Differential Diagnosis for Physical Therapists Screening

Differential Diagnosis for Physical Therapists: Screening for Referral, 6th Edition provides a step-by-step approach to screening for systemic disease and medical conditions that can mimic neuromuscular and musculoskeletal problems. It describes both red flags and yellow flags, so you can recognize the signs and symptoms for conditions outside the scope of physical therapy practice.

Differential Diagnosis Cerebrovascular Accident

Since migraines can present with paralysis or weakening of one side of the body mimicking a stroke, a medical examination is required to diagnose migraines (Goodman & Synder, 2007). Middle cerebral artery infarct and space-occupying lesion: Space occupying lesions may mimic stroke by exhibiting headaches, changes in mental status, deficits in speech, weakness, ataxia or disturbance in gait.
