

TYPE A TRANSMISSION FLUID

RELATED BOOK :

Type A Auto tranny fluid Modern equivalent

Type "A" was used in General Motors transmissions, and "Type F" was used in Ford-based transmissions. In the earlier years, with the friction materials of the day, it was critical to use the correct fluid - for the simple reason the "co efficient of friction" was different.

Modern Substitute for Type A ATF Bob Is The Oil Guy

I have friction curves for TASA and Type F and they are TOTALLY different. So one fluid cannot truly cover both applications as they were originally defined. That is why I referred to MB 236.2 for a TASA fluid because they have an OEM approval attached to them. As far as I know the only type F fluid that can be relied on to
