Pinging WCF Services Stack Overflow

The two things I do are a telnet check to make sure the WCF process has the socket open. telnet host 8080 The second thing I do is always add an IsAlive method to my WCF contract so that there is a simple method to call to check that the service host is operating correctly.

configuration Timeouts WCF Services Stack Overflow

How do the timeouts work in WCF? I know for example that you can configure sendTimeout and receiveTimeout for a client's binding. But how do they work? MSDN describes sendTimeout as: A TimeSpan value that specifies the interval of time provided for a send operation to complete.

WCF Vs ASMX Web Services WCF Tutorial

First of all, it needs to understand that WCF Service provides all the capabilities of .NET web services and further extends it. Simple and basic difference is that ASMX web service is designed to send and receive messages using SOAP over HTTP only. While WCF service can exchange messages using any format (SOAP is default) over any transport protocol (HTTP, TCP/IP, MSMQ, NamedPipes etc).
