Information and Data Modeling Sparx Systems

Built-in data modeling profile. Enterprise Architect's built-in Data Modeling profile extends the UML to provide an intuitive mapping from the database concepts of tables and relationships onto the UML concepts of classes and associations. These extensions model database keys, triggers, constraints, RI and other relational database features.

Enterprise Data Modeling DATAVERSITY

Enterprise Data Modeling is a Special Skill I recently came across the following posting on LinkedIn that illustrates the misunderstanding that some organizations have with enterprise modeling. Looks like I will not become the new Chief Enterprise Architect of a growing public company in Silicon Valley.
