Need a New Cooling System Consider a Heat Pump Seriously

Conventional Central Split Heat Pump (top left). At first glance, it looks like a furnace/AC combo. But there is no gas being burned here. A refrigerant line runs from the outdoor condenser to a coil inside the air handler, which is connected to a duct system.

Geothermal heat pump Wikipedia

A geothermal heat pump or ground source heat pump (GSHP) is a central heating and/or cooling system that transfers heat to or from the ground.. It uses the earth all the time, without any intermittency, as a heat source (in the winter) or a heat sink (in the summer). This design takes advantage of the moderate temperatures in the

ground to boost efficiency and reduce the operational costs of
