Puberty Wikipedia

Size and virility. In boys, testicular enlargement is the first physical manifestation of puberty (and is termed gonadarche). Testes in prepubertal boys change little in size from about 1 year of age to the onset of puberty, averaging about 2 3 cm in length and about 1.5 2 cm in width. The size of the testicles is among the parameters of the Tanner scale for male genitals, from stage I

Voice change Wikipedia

A voice change or voice mutation, sometimes referred to as a voice break, commonly refers to the deepening of the voice of people as they reach puberty. Before puberty, both sexes have roughly similar vocal pitch, but during puberty the male voice typically deepens an octave, while the female voice usually only deepens by a few notes..

A similar effect is a voice crack during which a person's
