What is ITIL Configuration Management TeamQuest

Configuration management (CfM) is one of the components in the ITIL Service Support area. The primary goal of CfM is to identify, maintain, and verify information on IT assets and configurations in the enterprise. CfM stores up-to-date information about configuration items (CIs) in a configuration management database (CMDB).

ITIL What goes in a Configuration Management Plan

Configuration management is one of the few processes that overarch all other process and service lifecycle phases in ITIL V3. Without it, the effectiveness of the rest of your processes will be in serious jeopardy. If I am to implement ITIL from scratch, I will pick Service Asset and Configuration Management (SACM) as my

frontline soldier.
