Weight loss Wikipedia

Intentional. Intentional weight loss is the loss of total body mass as a result of efforts to improve fitness and health, or to change appearance through slimming. Weight loss in individuals who are overweight or obese can reduce health risks, increase fitness, and may delay the onset of diabetes. It could reduce pain and increase movement in people with osteoarthritis of the knee.

Canoe and Kayak Paddling Exercises

I did a presentation at Canoeopia on March 11 where I showed how to pack a kayak for a multi-day trip.

Camping from a kayak is a great joy and one that I hope all paddlers will have an have opportunity to experience at some point in their lives.

Neural networks and deep learning

Note, by the way, that the `net.large_weight_initializer()` command is used to initialize the weights and biases in the same way as described in Chapter 1. We need to run this command because later in this chapter we'll change the default weight initialization in our networks.
