3 Ways The Environment Shapes Human Behavior Mutual

Many scientific researches have shown an obvious fact, that the behavior of a human being is created by the environment. If genes predispose a certain behavior but the environment doesn't support it, then that behavior won't manifest, so in this case, genes aren't important.

Dog behavior Wikipedia

Dog behavior is the internally coordinated responses of individuals or groups of domestic dogs to internal and external stimuli. It has been shaped by millennia of contact with humans and their lifestyles. As a result of this physical and social evolution, dogs, more than any other species, have acquired the ability to understand and communicate with humans and they are uniquely attuned to

Behavior Wikipedia

Behavior (American English) or behaviour (Commonwealth English) is the range of actions and mannerisms made by individuals, organisms, systems, or artificial entities in conjunction with themselves or their environment, which includes the other systems or organisms around as well as the (inanimate) physical environment. It is the response of the system or organism to various stimuli or inputs

Homo sapiens The Smithsonian Institution's Human Origins

The species that you and all other living human beings on this planet belong to is Homo sapiens. During a time of dramatic climate change 300,000 years ago, Homo sapiens evolved in Africa. Like other early humans that were living at this time, they gathered and hunted food, and evolved behaviors that helped them respond to the challenges of survival in unstable environments.
