### **Bonds Market value Current Price Finance Basics Cash**

Market value is not the price you will buy on the market. It is a theoretical amount, which tells you what the bond is worth. It can be used to make decisions about the bond. If theoretical price is higher than the current price (which is the price which you can actually buy the bond on the market) the bond is worth it, if it is lower, it is

### **What is the value of a bond Calculators by CalcXML**

Bond values are very sensitive to market interest rates. For example, if you purchased bond with a stated/coupon rate of 10% and market rates had declined to 8% since you purchased the bond, then the value of your 10% bond in a market crediting 8% would be higher. Use this calculator to help determine the value of a bond.
