PRINCIPLES OF MATHEMATICAL ANALYSIS

Principles of Mathematical Analysis | Walter Rudin 9. Define $(x,y) = T(r, \theta)$ on the rectangle $0 \leq r \leq a$; $0 \leq \theta \leq 2\pi$ by the equations $x = r \cos \theta$; $y = r \sin \theta$. Show that T maps this rectangle onto the closed disc D with center at $(0,0)$ and radius a , that T is one-to-one in the interior of the rectangle, and that $JT(r, \theta) = r$.

The name "mathematical analysis" is a short version of the old name of this part of mathematics, "infinitesimal analysis"; the latter more fully describes the content, but even it is an abbreviation (the name "analysis by means of infinitesimals" would characterize the subject more precisely).
