Rate of return Wikipedia

The internal rate of return (IRR) (which is a variety of money-weighted rate of return) is the rate of return which makes the net present value of cash flows zero. It is a solution satisfying the following equation: $NPV = 0$ where: NPV = net present value, and CF_t = net cash flow at time t , including the initial value and final value, net of any other flows at the beginning and at the end
