RELATED BOOK :

Schizoaffective disorder Wikipedia

Schizoaffective disorder (SZA, SZD or SAD) is a mental disorder characterized by abnormal thought processes and an unstable mood. The diagnosis is made when the person has features of both schizophrenia (usually psychosis) and a mood disorder either bipolar disorder or depression but doesn't meet the diagnostic criteria for schizophrenia or a mood disorder separately.

Bipolar disorder Wikipedia

Bipolar disorder, previously known as manic depression, is a mental disorder that causes periods of depression and periods of abnormally elevated mood. The elevated mood is significant and is known as mania or hypomania, depending on its severity, or whether symptoms of psychosis are present. During mania, an individual behaves or feels abnormally energetic, happy, or irritable.
