Magnet Wikipedia

The magnet does not have distinct north or south particles on opposing sides. If a bar magnet is broken into two pieces, in an attempt to separate the north and south poles, the result will be two bar magnets, each of which has both a north and south pole. However, a version of the magnetic-pole approach is used by professional magneticians to

THE TWO ENDS OF A MAGNET nde ed org

Remember that a compass is a magnet and the north pole of a magnet is attracted to the south pole of a magnet. This situation is also seen in Experiment 1 & 2. In Experiment 2, when you move the north pole of a magnet toward the south pole of the other magnet, the two magnets attract.

What makes the north pole of a magnet different from the

The north pole of a magnet will attract a South pole of a magnet and repel another north pole. And a Magnets south pole will attract a north pole of another magnet and repel a South pole. This is true with an interesting exception . If you have a magnet and you have tested it to determine it's polarity.

What Are Magnetic Poles and How to Identify Them Apex

The north pole of a magnet seeks the magnetic north, whereas the south pole seeks the south. On the other hand, the opposite poles of magnets attract each other-north attracts south and vice versa, so remember that the Earth s physical north pole actually acts like the south pole of a magnet.

Facts About Magnetism for Kids

The Earth is a very big magnet. Its North and South poles are highly magnetic. The Earth s magnetic force is not very strong. The magnets on your refrigerator have more magnetic force. A collapsed star, known as a neutron

star, has the strongest magnetic force of any object in the universe.

Earth's Magnetic Poles Windows to the Universe

Earth's magnetic field is shaped like the magnetic field of a gigantic bar magnet. Of course, there isn't really a huge bar magnet inside of Earth! Notice how Earth's North Magnetic Pole is actually the south pole of the magnetic field. Earth's magnetic field makes an area in space around our planet called the magnetosphere.
