Night Chills by Dean Koontz Goodreads

Night Chills was probably so far, for me one of his darkest books, with a few disturbing rape scenes. Aside from that, it was a good read, the mind manipulation plot was interesting, in a creepy kind of way, kind of reminded me of the Jedi Mind trick from Star Wars, HAHA!

What causes night chills Zocdoc Answers

Night chills alone are most likely nothing to worry about. At night when we are sleeping, our body's metabolism slows down quite a bit. This causes the body to produce less heat than when it is awake. This can cause your body temperature to drop slightly and feel colder. This is not unusual.

Night Chills Dean Koontz 9780425098646 Amazon com Books

Night Chills was a good book but I was slightly disappointed in it. There were portions of the book that were page turning action but unfortunately there was often 20 pages or so of what I found to be boring conversation between characters discussing the science behind memory and control.

Got Chills but Not Running a Temperature Why

Getting a good night's rest can ease the severity of the chills. It is recommended that you get around 8-9 hours of sleep a night. Eat on a regular basis, making sure you don't go hours without having some form of nutrition.

Night Chills by Dean Koontz Paperback Barnes Noble

Night Chills was written in the 1970's and the concept seems fairly original it is about a group of men who drug a small town in Maine and then feed them subliminal messages. One of the sex scenes (between the hero and heroine) made me roll my eyes and it added little to the plot, but overall it was a fast and interesting read.

What are Common Causes of Night Sweats and Chills

Since night sweating and chills can be symptoms of a serious medical condition, a person may do well to consult a medical professional if he has unexplained symptoms for more than two weeks. Even medication can sometimes cause a person to suffer from night sweats and chills.

7 Conditions That Might Cause Chills With No Fever

Any chills without fever I've had before or since were far eclipsed by the chills of menopause - waking up sweat-drenched in the middle of the night, throwing off the covers, then waking up freezing and shivering.
