Radio controlled glider Wikipedia

This method of launching can be performed only on a special type of glider - a Discus Launch Glider (DLG). To launch the model into the air, the pilot holds the model by the tip of a wing, spins 360°, rotating the model around their body and then releases hold of the model allowing it to launch at high speed and climb to height.

R C Sailplanes Handlaunch DLG Sailplanes fatlion

Handlaunch sailplanes, Hand-Launch Gliders or "HLG" are smaller sized planes that typically weigh between 6 and 15 ounces, but any plane that you feel comfortable throwing into the air could be classified as a "handlaunch". These sailplanes are launched merely by throwing hard to get altitude, or by using a towing mechanism from the ground such as a long rubber band known as a hi-start or with

Foam Zanoia Glider endlessLift

Hello Gary, I like your zanoia project and I like the way you launch it, like an rc discus launched glider. Me and my students dealt with zanoia shapes as walkalong gliders and we had some bionic projects this year.

The Building Board 1 2A Texaco DeBolt Airfoiler Flying Report

We just got back from flying this evening at Plum Brook.Made three flights with the Airfoiler.Added a one ounce weight to the nose and down and right thrust. The model responded better in the climb out, but I had to add down elevator in the breezy winds aloft.
