The Language Instinct Wikipedia

The Language Instinct is a 1994 book by Steven Pinker, written for a general audience. Pinker argues that humans are born with an innate capacity for language. He deals sympathetically with Noam Chomsky's claim that all human language shows evidence of a universal grammar, but dissents from Chomsky's skepticism that evolutionary theory can explain the human language instinct.

As the title suggests, Pinker's The Language Instinct supports the theory that language is innate and that humans have a common "universal grammar". This is a major theme of his book. Another is the correction of common misconceptions about language and the refutation of popular "factoids" with no basis in reality.
