### **Colonization of Mars Wikipedia**

Mars is the focus of much scientific study about possible human colonization. Mars's surface conditions and past presence of water make it arguably the most hospitable planet in the Solar System besides Earth. Mars requires less energy per unit mass to reach from Earth than any planet, other than Venus. Permanent human habitation on other planets, including Mars, is one of science fiction's most

### **10 Discoveries That Shed Light On Mysteries Of Our Solar**

As we've discussed before, scientists have wondered for decades why the temperature of the Sun's corona, or outer atmosphere, is so much hotter than its photosphere, or visible surface. Defying all logic, the surface of the Sun has a temperature around 6,000 Kelvin (about 6,000 degrees Celsius, or 10,000 F), while the corona often becomes 300 times hotter.

### **Hypothetical Planets Solar System**

The Moons of Mars, 1610 - 1877. The first to guess that Mars had moons was Johannes Kepler in 1610. When trying to solve Galileo's anagram referring to Saturn's rings, Kepler thought that Galileo had found moons of Mars instead.. In 1643, the Capuchin monk, Anton Maria Shyrl, claimed to have seen the moons of Mars.
