### **Dementia Wikipedia**

Dementia is a broad category of brain diseases that cause a long-term and often gradual decrease in the ability to think and remember that is great enough to affect a person's daily functioning. Other common symptoms include emotional problems, difficulties with language, and a decrease in motivation. A person's consciousness is usually not affected. A dementia diagnosis requires a change from

### **Death and Dementia Magazine**

My very first blog post on Death and Dementia a site originally dedicated to creepy, unexplained murders and deaths (before originally branching out to a far less grim subject matter, mostly general horror stuff) dealt with the death of Elisa Lam. She was a Canadian student who, on her visit to LA, mysteriously drowned in her hotel's water tank despite the fact that she wasn't

### **Prevalence Wikipedia**

Prevalence in epidemiology is the proportion of a particular population found to be affected by a medical condition (typically a disease or a risk factor such as smoking or seat-belt use). It is derived by comparing the number of people found to have the condition with the total number of people studied, and is usually expressed as a fraction, as a percentage, or as the number of cases per
