Wood burning stove Wikipedia

A wood-burning stove (or wood burner or log burner in the UK) is a heating appliance capable of burning wood fuel and wood-derived biomass fuel, such as sawdust bricks. Generally the appliance consists of a solid metal (usually cast iron or steel) closed firebox, often lined by fire brick, and one or more air controls (which can be manually or automatically operated depending upon the stove).

The Wood Burning Cook Stove In My Kitchen

I have learned a lot during the years I have kept fires in this stove. I have learned that wood stoves can be messy and that cooking or baking with a wood stove is nowhere near as easy as setting an oven thermostat or turning on a burner.

Stove Wikipedia

A stove is an enclosed space in which fuel is burned to heat either the space in which the stove is situated, or items placed on the heated stove.. There are many types of stoves, such as the kitchen stove, which is used to cook food, and the wood-burning stove or a coal stove, which is typically used for heating a dwelling.. Due to concerns about air pollution, efforts have been made to
