The Agile System Development Life Cycle SDLC

This book, Disciplined Agile Delivery: A Practitioner's Guide to Agile Software Delivery in the Enterprise describes the Disciplined Agile Delivery (DAD) process decision framework. The DAD framework is a people-first, learning-oriented hybrid agile approach to IT solution delivery. It has a risk-value delivery lifecycle, is goal-driven, is enterprise aware, and provides the foundation for

Agile Testing and Quality Strategies Discipline Over Rhetoric

The whole team approach works well in practice when agile development teams find themselves in reasonably straightforward situations. However, teams working at scale in complex environments will find that a whole team approach to testing proves insufficient.

Agile software development Wikipedia

Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and continual improvement, and it encourages rapid and flexible response to change.
