### **Hearing range Wikipedia**

Hearing range describes the range of frequencies that can be heard by humans or other animals, though it can also refer to the range of levels. The human range is commonly given as 20 to 20,000 Hz, although there is considerable variation between individuals, especially at high frequencies, and a gradual loss of sensitivity to higher frequencies with age is considered normal.

### **Speed Reading 4 Kids Reduce Study Time By Half**

In 1980 I became convinced that speed reading could become a universal skill for all children if it were just made available in the right way to the general public. At that time the only speed reading courses available were those which cost hundreds of dollars per student. Also, these same courses were directed at adults (mostly college students and business owners).
