Chemistry Wikipedia

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it

Ji Chang Wook AsianWiki

and Dec 11 2018 3:35 am I've always loved Ji Chang Wook in whatever dramas/movies he is in. In my opinion, his acts are the best when it comes to action scenes (k2,healer). He just carries that badass image so well that I won't hesitate to believe that he's a former bodyguard or a spy.
