Hypothyroidism Wikipedia

Hypothyroidism, also called underactive thyroid or low thyroid, is a disorder of the endocrine system in which the thyroid gland does not produce enough thyroid hormone. It can cause a number of symptoms, such as poor ability to tolerate cold, a feeling of tiredness, constipation, depression, and weight gain. Occasionally there may be swelling of the front part of the neck due to goiter.

Graves' Disease Diet Graves Disease Cure

I also realized that the information I share in my first book Life Manual for Graves Disease and Hyperthyroidism, especially for diet is not enough. I didn't have the knowledge or experience to write more, unfortunately. Even though I believe that proper diet counts for about 25% of the whole healing process, it still deserves its attention.
