Scrum software development Wikipedia

Scrum is an agile framework for managing knowledge work, with an emphasis on software development. It is designed for teams of three to nine members, who break their work into actions that can be completed within timeboxed iterations, called "sprints", no longer than one month and most commonly two weeks, then track progress and re-plan in 15-minute stand-up meetings, called daily scrums.

Scrum Methodology and Project Management

Scrum is an agile way to manage a project, usually software development. Agile software development with Scrum is often perceived as a methodology; but rather than viewing Scrum as methodology, think of it as a framework for managing a process.

Agile project management with Scrum

Abstract. Scrum is one of the agile methodologies designed to guide teams in the iterative and incremental delivery of a product. Often referred to as an agile project management framework, its focus is on the use of an empirical process that allows teams to respond rapidly, efficiently, and effectively to change.
