

[WEANING A BABY](#)

RELATED BOOK :

Weaning When and how to stop breastfeeding BabyCenter

Baby-led weaning: Weaning is easiest when your child begins to lose interest in nursing, and that can happen any time after she starts eating solids (around 4 to 6 months). Some babies are more interested in solid food than breast milk by 12 months, after they've tried a variety of foods and can drink from a cup.

Weaning How To La Leche League International

If weaning is your decision, it's best for you and your baby to do it gradually, and with love. If you wean cold turkey, your breasts will likely become painfully engorged, and you might develop a breast infection. Your baby will probably fight the switch from your warm, soft breast to a plastic substitute.

Weaning advice C G baby club

Weaning is another exciting milestone for you and your baby. The Department of Health recommend that weaning should start when your baby is around 6 months old. To begin with the amount your baby eats is less important than getting used to solid foods as they will continue to get most nutrients from milk.
