Compound Interest Table A Powerful Investment Tool

Move across each row on the compound interest table to see the effects of changing the rate of return. Take a look at the row that starts with the 20-year time-horizon. Now move across to the 5% annual rate of return column. Note the compounding factor of 2.65. If you invested \$10,000 at a 5% interest rate for 20 years you would have \$26,500.
