A Simple Guide to Raising Milking Goats

Raising baby goats: A baby goat must drink from its mother for at least 8 weeks before it can be weaned to complete hay or pasture. Some goat owners will take the babies away from the mother right away and bottle feed. They will keep them in separate places, milk the mother, and then pour the milk into a bottle and feed the baby.

How to Raise Dairy Goats for Milk The Spruce

How to Milk a Goat. Goat's milk is naturally homogenized because the fat globules are smaller than those in cow's milk. The cream will not separate in goat's milk, making butter and cream difficult to make. However, goat's milk products are creamy and smooth because of these small fat globules.
