Lawn Wikipedia

A lawn is an area of soil-covered land planted with grasses and other durable plants such as clover which are maintained at a short height with a lawnmower (or sometimes grazing animals) and used for aesthetic and recreational purposes. Common characteristics of a lawn are that it is composed only of grass species, it is subject to weed and pest control, it is subject to practices aimed at

The History of Lawns Planet Natural

The lawn appears to be a European invention, which makes ecological sense because the moist, mild, climate of Europe supported open, close-cut grasslands. (The less temperate climate of North America does not.) The Middle English word launde originally referred to a glade or opening in the woods
