### **Vocal Training with Ear and Pitch Exercises My Voice**

At the most fundamental level, good singing is about recognizing and hitting a certain note correctly and in succession. Many adept musicians have their ears trained to automatically recognize a note's pitch, so that they can reproduce the correct notes without necessarily listening to the song again.

### **Voice therapy transgender Wikipedia**

Voice therapy or voice training refers to any non-surgical technique used to improve or modify the human voice. Because voice is a gender cue, trans people may frequently undertake voice therapy as a part of gender transition in order to make their voices sound more like what is typical of their gender, and therefore increase their readability as that gender in society.
