

PLASTIC GAS LINE

RELATED BOOK :

Plastic Wikipedia

Plastic is material consisting of any of a wide range of synthetic or semi-synthetic organic compounds that are malleable and so can be molded into solid objects.. Plasticity is the general property of all materials which can deform irreversibly without breaking but, in the class of moldable polymers, this occurs to such a degree that their actual name derives from this specific ability.

Our Oceans A Plastic Soup blogs ei columbia edu

Some plastic and marine debris comes from fishing gear, offshore oil and gas platforms, and ships. But 80 percent of it comes from the land litter that gets stuck in storm drains and is washed into rivers and out to sea, the legal and illegal dumping of garbage and appliances, and plastic resin pellets inadvertently spilled and unloaded by plastic manufacturers.
