

## **PACKAGING AND DESIGN**

## RELATED BOOK :

### **Packaging and labeling Wikipedia**

Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale, and use. Packaging also refers to the process of designing, evaluating, and producing packages. Packaging can be described as a coordinated system of preparing goods for transport, warehousing, logistics, sale, and end use.

### **Packaging Design Packaging Digest**

The IoPP Fundamentals of Packaging Professionals, Third Edition outlines that package design is composed of two separate components - structural and graphical. Prior to designing the package, attention should be focused on the product itself by anticipating end user wants and needs. The structural component entails the technical and physical requirements of the package.
