Universal Psionic Items d20srd org

Each of the various psionic restraints is an iron cuff that cunningly locks around the wrist (DC 27 Open Lock check). The cuff limits the total number of power points a psionic creature wearing it can use in 1 round (regardless of the creature's total power point reserve), or completely damps the ability to use psionics.

Why Mint Tastes Cold Today I Found Out

Today I found out why mint tastes cold. Similar to why peppers taste hot, what's going on here is there is a chemical in mint, menthol, which is tricking the brain into thinking that the area the menthol is applied to is cold; even though in fact, it's the same as it was before. More

Neuron Wikipedia

A neuron, also known as a neurone (British spelling) and nerve cell, is an electrically excitable cell that receives, processes, and transmits information through electrical and chemical signals. These signals between neurons occur via specialized connections called synapses. Neurons can connect to each other to form neural pathways, and neural circuits.

Neuralink and the Brain's Magical Future Wait But Why

The What the Hell is it Actually Called Blue Box. The cerebrum is the whole big top/outside part of the brain but it also technically includes some of the internal parts too.. Cortex means bark in Latin and is the word used for the outer layer of many organs, not just the brain. The outside of the cerebellum is the cerebellar cortex. And the outside of the cerebrum is the cerebral cortex.
