RELATED BOOK :

Cometic MLS Head Gaskets Summit Racing Equipment

Cometic MLS head gaskets are constructed from multiple layers of stainless steel for strength and contain load-controlled embossments that conform load distribution across the sealing area. This creates an exceptional seal by requiring less clamp load--resulting in less bore distortion.

Fel Pro PermaTorque Multi Layer Steel Head Gaskets JEGS

MLS Gaskets are stronger, more forgiving, and capable of sealing despite movement between the head and block. Such motion results from: lighter, thinner aluminum head castings that are more susceptible to thermal expansion; computer controls that can dramatically increase engine output; reduced clamping force that prevents stress points and

Head Gasket Installation Tips Speedway Motors

Head Gasket Installation Tips For head gaskets to seal properly, the head and engine block deck surfaces must be clean, smooth, and flat. The presence of any foreign material (dirt, carbon, old gasket material, abrasive residue, etc.) on either surface can cause an improper seal.

Cometic MLS Head Gaskets Fab9Tuning

No. MLS head gaskets require smooth, flat and true head and deck surfaces to seal. Most of the time with o-ring setups the wire and groove fall where our gasket's combustion seal is located; therefore, the wire will hold the gasket and not allow proper compression while the receiver grooves allow combustion gases to escape.

MLS Head Gaskets There's More To It Than Just Bolting

MLS is short for Multi-Layer-Steel. Several sheets of stainless steel are layered to give the desired thickness. An MLS gasket's ability to protect against blow-out in high cylinder-pressure situations is due to the embossed layers acting as a "spring" to account for increased head lift.
