Human Knowledge Foundations and Limits

Why is there something rather than nothing? Might the world be an illusion or dream? What exists beyond the human senses? What happens after death? Does divine or supernatural agency exist? Is the future already decided?; What is the meaning of life? What is right and wrong? Is the world good or bad? Are humans good or evil? What beings should have what rights?

Natural selection Wikipedia

Natural selection is the differential survival and reproduction of individuals due to differences in phenotype. It is a key mechanism of evolution, the change in the heritable traits characteristic of a population over generations. Charles Darwin popularised the term "natural selection", contrasting it with artificial selection, which is intentional, whereas natural selection is not.

Evolution Wikipedia

In the 1920s and 1930s the so-called modern synthesis connected natural selection and population genetics, based on Mendelian inheritance, into a unified theory that applied generally to any branch of biology. The modern synthesis explained patterns observed across species in populations, through fossil transitions in palaeontology, and complex cellular mechanisms in developmental biology.
