Rockwell scale Wikipedia

The Rockwell scale is a hardness scale based on indentation hardness of a material. The Rockwell test determines the hardness by measuring the depth of penetration of an indenter under a large load compared to the penetration made by a preload. There are different scales, denoted by a single letter, that use different loads or indenters.

Rockwellhardheid Wikipedia

De Rockwellhardheid (HR) is een maat voor de hardheid van materialen, bepaald volgens de

Rockwellhardheidstest. In die test wordt hardheid ge nterpreteerd als "weerstand tegen plaatselijke penetratie". De test bepaalt de nettodiepte waarop een penetrator in het materiaal is doorgedrongen nadat er een standaardlast op aangebracht is.

Shay Cast Bullet Alloy BHN Test Equipment Comparison

At initial glance, LBT and SAECO tools seem to have the highest standard deviation. Throwing out the high LBT tool reading and eliminating the early test that was redone with a different batch of bullets closer to the testing date moves the standard deviation more into line with the Cabine Tree and Lee testers.
