Influenza vaccine Wikipedia

Medical uses. The CDC recommends the flu vaccine as the best way to protect people against the flu and prevent its spread. The flu vaccine can also reduce the severity of the flu if a person contracts a flu strain that the vaccine did not contain. It takes about two weeks following vaccination for protective antibodies to form.. A 2012 meta-analysis found that flu vaccination was effective 67

Doctors Speak Out on Vaccine Injury

Gianna Wehrkamp, 2 (above), was vaccinated for flu, got the flu, and was given Tamiflu, and died within 24 hours. This is a disturbing, but growing trend. When children vaccinated for the flu or other disease then get the disease, they are often administered another pharmaceutical product such as Tamiflu, Tylenol, Ibuprofen or Vancomycin.
