RELATED BOOK :

How to Make Clear Transparent Soap From Scratch Making

Transparent soap is simply hot process soap that uses solvents (sugar, glycerin and alcohol) to dissolve the soap crystals that form allowing light to pass, therefore creating transparency. When creating a transparent soap recipe, choose at least 75% hard oils (coconut oil, palm oil, tallow, lard, stearic acid).

Making Transparent Soap Bearchele

Transparent soap is basically partly soap and partly solvent. Sodium Hydroxide causes crystals to form in soap and that is why the soap becomes opaque, in order to make it transparent, you have to dissolve the soap in enough solvent to make the crystals so small that the light will freely pass through the soap, which makes it look transparent.
