

THE GLOBAL WARMING

RELATED BOOK :

Global warming Wikipedia

Global warming is a long-term rise in the average temperature of the Earth's climate system, an aspect of climate change shown by temperature measurements and by multiple effects of the warming. The term commonly refers to the mainly human-caused observed warming since pre-industrial times and its projected continuation, though there were also much earlier periods of global warming.

GlobalWarming.org Climate Change News Analysis

The House is expected to vote this week on H.Con.Res.119 expressing the sense of Congress that a carbon tax is detrimental to the U.S. economy. The House passed similar legislation in June 2016 by 237 to 163, with six Democrats voting in favor and no Republicans voting against.. The vote is apparently timed to put House members on record once again before Rep. Carlos Curbelo (R.-Fla.), co

Effects of global warming Wikipedia

The effects of global warming are the environmental and social changes caused (directly or indirectly) by human emissions of greenhouse gases. There is a scientific consensus that climate change is occurring, and that human activities are the primary driver. Many impacts of climate change have already been observed, including glacier retreat, changes in the timing of seasonal events (e.g

Global Warming Spin and Media Global Issues

Accompanying the concerns of climate change and global warming is the media spin, propaganda, and special interests. For many years in some countries, scientists and environmental groups raising concerns about climate change faced stern opposition, and at one time, ridicule. Initially, many big businesses and countries such as the United States were openly challenging concerns of climate change.
