2 BUILDING YOUR OWN WOOD GAS GENERATOR Gengas

If this unit is to be used on stationary engines or on slow-moving vehicles, a gas cooler and a secondary filter must be placed in the piping system between the generator unit and the carburetor. The ideal temperature for the wood gas at the inlet to the carburetor manifold would be 70 o F, with acceptable peaks of 140 to 160 o F.

A Home Built Biomass Gasifier for Producing Wood Gas 14

Treat the gas coming out of the gasifier with the same respect as you would for the natural gas that you may have piped into your house. It is just as potentially explosive and deadly. As I said in step 1, a biomass gasifier is a chemical reactor that converts wood, or other biomass substances, into a combustible gas.
