Intellectual giftedness Wikipedia

Intellectual giftedness is an intellectual ability significantly higher than average. It is a characteristic of children, variously defined, that motivates differences in school programming. It is thought to persist as a trait into adult life, with various consequences studied in longitudinal studies of giftedness over the last century.

Societal and cultural aspects of autism Wikipedia

Societal and cultural aspects of autism come into play with recognition of autism, approaches to its support services and therapies, and how autism affects the definition of personhood. The autistic community is divided primarily into two camps; the neurodiversity movement and the autism cure movement. The neurodiversity movement believes autism is a different way of being and advocates against

Treatment of Autism Spectrum Disorders with Vision Therapy

I am the parent of an autistic child. Too often, visual problems which would have been detected early in non-disabled children go undiagnosed and untreated for children with disabilities, perhaps because the visual examination would be difficult with the special needs child, or the child is not able to verbalize a problem, or the school's test showed "normal" 20/20 eyesight. Whatever the
