Shower Wikipedia

A shower is a place in which a person bathes under a spray of typically warm or hot water. Indoors, there is a drain in the floor. Most showers have temperature, spray pressure and adjustable showerhead nozzle. The simplest showers have a swivelling nozzle aiming down on the user, while more complex showers have a showerhead connected to a hose that has a mounting bracket.

Steam Shower How It Works This Old House

The Basics. What it is: A moisture-sealed shower enclosure equipped to deliver clouds of steam before, during, or after your shower. How it works: Cold water piped into a steam generator is heated to the boiling point and then sends fresh steam to an aperture in the shower stall. Digital controls inside the shower let the user adjust the steam's temperature and duration and can even add piped
