Grow light Wikipedia

A range of bulb types can be used as grow lights, such as incandescents, fluorescent lights, high-intensity discharge lamps (HID), and light-emitting diodes (LED). Today, the most widely used lights for professional use are HIDs and fluorescents. Indoor flower and vegetable growers typically use high-pressure sodium (HPS/SON) and metal halide (MH) HID lights, but fluorescents and LEDs are

Best LED Grow Lights Reviews For 2018 by Experts in Growing

Looking for an LED Grow Light? Having the right grow lights in your set up can be one of the most crucial things you make sure of. Plants can grow just fine when you have all of the right nutrients going to them, have all of the most up to date hydroponic technology delivering them, and an airflow system that makes sure they are always cool and filled with oxygen, but without light none of

LED Grow Lights vs High Pressure Sodium HPS Grow Lights

I agree that LEDs are better all-around for growing, but that s only true with high-quality LED grow lights. Unfortunately, there are so many low-quality lights on the market and that has given LED lights a bad reputation, so much so that most growers still seem to prefer MH and HPS.
