Beekeeping Wikipedia

Most such bees are honey bees in the genus Apis, but other honey-producing bees such as Melipona stingless bees are also kept. A beekeeper (or apiarist) keeps bees in order to collect their honey and other products that the hive produce (including beeswax, propolis, flower pollen, bee pollen, and royal jelly), to pollinate crops, or to produce bees for sale to other beekeepers.

3 Ways to Keep Bees wikiHow

Visit the bees on a sunny day when flowers are in bloom so the majority of the bees will be out and working. Wash any clothing bees may have stung previously when visiting, the residual pheromones could incite another attack. Use a smoker to fill the hive with smoke and keep the bees docile when opening it to inspect.

Keeping Backyard Bees

Nectar dearth is a phrase that you hear frequently in beekeeping. Simply put, it means that instead of your honeybees finding readily available nectar and pollen-producing flowers, they are chowing down on their stored honey. And bees need honey stores to survive my cold winters here in the mid-Atlantic.

But ask beekeepers why they keep bees and few will say it's for this reason alone. No, the joy in beekeeping comes from the creatures themselves seeing bees fly in with 'bloomers' of pollen; listening to the contented hum from a hive on a warm summer's day and marvelling at the precision of their hexagonal combs. http://ebookslibrary.club/download/How-to-keep-bees-Beekeeping-guide-countryliving-com.pdf
