Lessons Learned

There s section in the responsive.org manifesto that I want to ask you about. It s focused on the relationship between profit and purpose and how it s evolving. The growing consent is that profit is not the be all and end all, and a lot of that is coming from customers.

Software testing Wikipedia

Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.
