Experiment Wikipedia
Overview. In the scientific method, an experiment is an empirical procedure that arbitrates competing models or hypotheses. Researchers also use experimentation to test existing theories or new hypotheses to support or disprove them.. An experiment usually tests a hypothesis, which is an expectation about how a particular process or phenomenon works.. However, an experiment may also aim to

Introduction to communities of practice Wenger Trayner

What are communities of practice? Communities of practice are formed by people who engage in a process of collective learning in a shared domain of human endeavor: a tribe learning to survive, a band of artists seeking new forms of expression, a group of engineers working on similar problems, a clique of pupils defining their identity in the school, a network of surgeons exploring novel
