How to choose a good thesis topic in Data Mining The

I have seen many people asking for help in data mining forums and on other websites about how to choose a good thesis topic in data mining.. Therefore, in this this post, I will address this question.. The first thing to consider is whether you want to design/improve data mining techniques, apply data mining techniques or do both. Personally, I think that designing or improving data mining

Papers by Keogh and collaborators that use SAX. (in random order) In [1] we show how to use SAX to find time series discords which are unusual time series. In [2] we consider a special case of SAX, which has an alphabet size of 2, and a word size equal to the raw data, and show that we can use this bit-level representation for a variety of data mining tasks.

Course Description 2nd International Summer School on

Summary In many fields today, multiple sets of data are readily available. These might either refer to multimodal data where information about a given phenomenon is obtained through different types of acquisition techniques, or multiset data where the datasets are all of the same type but might be acquired from different subjects, at different time points, or under different conditions.
