WI FI NETWORK SECURITY

RELATED BOOK :

Wi Fi Wikipedia
Different versions of Wi-Fi exist, with different ranges, radio bands and speeds. Wi-Fi most commonly uses the 2.4 gigahertz (12 cm) UHF and 5.8 gigahertz (5 cm) SHF ISM radio bands; these bands are subdivided into multiple channels. Each channel can be time-shared by multiple networks. These wavelengths work best for line-of-sight.Many common materials absorb or reflect them, which further

Wi Fi Alliance security update
Austin, TX October 16, 2017 Wi-Fi Alliance provides trusted security to billions of Wi-Fi devices and continues to support Wi-Fi users, as we have done for more than a decade. Recently published research identified vulnerabilities in some Wi-Fi devices where those devices reinstall network encryption keys under certain conditions, disabling replay protection and significantly

Wi Fi Security Should You Use WPA2 AES WPA2 TKIP or Both
AES vs. TKIP. TKIP and AES are two different types of encryption that can be used by a Wi-Fi network. TKIP is actually an older encryption protocol introduced with WPA to replace the very-insecure WEP encryption at the time.

Wi Fi Protected Setup Wikipedia
Wi-Fi Protected Setup (WPS; originally, Wi-Fi Simple Config) is a network security standard to create a secure wireless home network.. Created by the Wi-Fi Alliance and introduced in 2006, the goal of the protocol is to allow home users who know little of wireless security and may be intimidated by the available security options to set up Wi-Fi Protected Access, as well as making it easy to
