HOW TO MAKE WEB DATABASE

RELATED BOOK :

Build an Access database to share on the Web Access
Create a relationship between two web tables. To create a relationship in a web database, you use the lookup wizard to create a lookup field. The lookup field goes in the table that is on the many- side of the relationship, and points to the table that is on the one- side of the relationship.

How to Link a Database to a Web Page Chron com
How to Link a Database to a Web Page. If your site's data is stored in a database -- for example, using a database management system such as MySQL -- you may face the task of presenting the data within your Web pages. This process involves connecting to the database, querying it for data and presenting the data in HTML, often by using a server side scripting language such as PHP.
