PHP mcrypt create iv Manual
After profiling a rather large, dynamic website I maintain to determine the cause of intermittent freezing in
execution, I found that calls to mcrypt_create_iv() using MCRYPT_DEV_RANDOM as the source consistently
halted execution for anywhere from 0.2 to ~12 seconds per call, ironically at random.

Backup Your MySQL Database Using PHP David Walsh Blog

Hi Micheal, It looks like he is saving the output of the file to whichever directory this php code is located at. I might be wrong but the file name is timestamped and given a diffcult to guess name so nobody will stumble upon it and get access to his entire database structure-which would be not good!.
